## Electric Machines

The cost of energy has always motivated the development of electric machine design, but today the twin monsters of unbridled consumer demand and scarcity of required materials makes it ever more important to optimize designs with better analytical tools. Now CD-adapco meets the world of Electric Machines with the combination of two highly-accomplished and market-leading codes: the electric/electromagnetic design tool SPEED and the flow/thermal CFD focused CAE tool, STAR-CCM+.

CD-adapco

### **Industries:**

[Electric Machines](#) [2]

CD-adapco is the world's largest independent CFD focused provider of engineering simulation software, support and services. We have over 30 years of experience in delivering industrial strength engineering simulation.
