Optimal Thermal Management in Electronic Systems Design

Traditional simulation technology struggles to handle complex geometries, and fails to accurately model critical physical and environmental scenarios. Star-CCM+ is different. Not only does it capture the full detail of your actual design in high fidelity, but it also contains a full range of physics models that allow you to simulate any cooling strategy or environmental condition with ease.

Industries:

[Electronics](#) ^[1] ? Electronics - Application

[Electronics](#) ^[1] ? Electronics - Technology

Products:

[STAR-CCM+®](#) ^[2]

[Technologies](#) ^[3]

[Multi-disciplinary](#) ^[4]

CD-adapco is the world's largest independent CFD focused provider of engineering simulation software, support and services. We have over 30 years of experience in delivering industrial strength engineering simulation.
