STAR-CCM+: Harmonic Balance Innovations for Blade Thermal Durability

Flier:

The implementation of the revolutionary harmonic balance method for the solution of periodically repeating turbulent flows enables the study of unsteady effects in rotating machinery with computational time scales that are drastically reduced compared to traditional transient methodologies.

Industries:

[Turbomachinery](#)^[2]

Products:

[STAR-CCM+®](#)^[3]

[Technologies](#)^[4]

[Harmonic Balance](#)^[5]

CD-adapco is the world's largest independent CFD focused provider of engineering simulation software, support and services. We have over 30 years of experience in delivering industrial strength engineering simulation.
