User Experience Developer

Job Title:

User Experience Developer

Location:

USA

Reference Code:

CK-TBD-123

CD-adapco is seeking a User Experience Developer for one of our US office location.

Position Description:

The User Experience team is responsible for designing and programming an intuitive and efficient user interface and the underlying server-side code to support the STAR-CCM+ UI. The team works closely with engineers and scientists who develop high-performance software that performs accurate engineering simulations. Our users are engineers and scientists, not consumers.

Job Function:

Server-side code is mostly in C++. Client-side code is in Java / NetBeans.

There is a desktop client. No web client exists at present.

Most of us use Eclipse. We use Git for source control, JIRA for issue management, and Crucible for code reviews.

Our development method is mildly agile (frequent deliverables, little planning up-front), but not scrum. Functional testing is in place, and unit testing is being introduced.

Technical Requirements:

- Expertise in UI development in Java with Swing, SWT, and the NetBeans Platform (not necessarily the NetBeans IDE). Experience with similar libraries such as QT is also valuable
- Expert in object-oriented design
- Comfortable with design as well as implementation
- Excellent teamwork skills and ability to assist other team members in problem-solving
- Ability to thrive in a dynamic, fast-paced environment
- Ability to handle multiple tasks with minimal oversight
- Master's Degree in Computer Science or Engineering (or)
- Bachelor's Degree plus work experience

Expertise in these areas is a bonus:

- Physics or math

- CAD or 3D graphics
- Graphic design
- C++
- Parallel computing

CD-adapco offers a stimulating working environment, competitive benefits and job growth opportunities. All qualified applicants are encouraged to submit a resume and cover letter outlining your unique qualifications for this position to hr-us@cd-adapco.com [1]. ?User Experience Developer, Software ? CK-TBD-123 (multiple locations, USA? in the subject line.

About CD-adapco

CD-adapco is the world's largest independent CFD focused provider of engineering simulation software, support and services. We have over 30 years of experience in delivering industrial strength engineering simulation. The scope of our activities extends well beyond software development to encompass a wide range of CAE engineering services in both CFD and FEA.

We have over 7,000 users of our software, working at 3,000 different companies, spending over \$100 million on our software and services. Our customer approval ratings are very high; in our last customer survey 93% of our customers declared themselves satisfied, or very satisfied with our software and services, a fact reflected in a consistently high customer retention rate.

Consistently growing at an organic rate of over 17% per year, CD-adapco employs over 700 talented individuals, working at 21 offices around the globe, involved in dedicated support, software development and engineering services.
